

Figure 1 is a line graph showing the performance of various methods (JI, log JI, BPLN, log BPLN, Xtalk, log Xtalk, Xtalk.Unique, Xtalk.Unique.log) across different citation cutoffs (0.2 to 0.8). The y-axis represents performance, with a dotted line at the bottom. The graph shows that performance generally increases with citation cutoffs, with some methods (like JI and log JI) showing a sharp drop at higher cutoffs.
