	cilium assembly					- 20
Organelle Organization Transcription/ Translation	microtubule nucleation					
	Golgi organization					- 18
	rRNA processing					
	tRNA export from nucleus					
	viral transcription					- 16
	cotranslational protein targeting to membrane					
	ribosomal large subunit biogenesis					- 14
	ribonucleoprotein complex subunit organization					
NADI	dehydrogenase complex assembly					10 -
Respiration	cellular respiration					- 12 (levd
	mitochondrial ATP synthesis coupled proton transport					d)b
prot	ein import into mitochondrial matrix					- 10 ^ệ
ER Stress	ubiguitin-dependent ERAD pathway					- 8
	protein folding in ER					
	protein folding					0
PTMs	protein N-linked glycosylation via asparagine					
	protein alpha-1,2-demannosylation					- 6
	oligosaccharide-lipid intermediate biosynthetic process					
	GPI anchor biosynthetic process					- 4
Other	Rab protein signal transduction					•
	zinc ion transport
